OVERVIEW

Many companies overpay thousands of dollars due to improperly and ineffectively managing and depreciating their fixed assets. With ATMIT Fixed Assets System, you get total command over the entire fixed asset lifecycle – from acquisition to disposal. It has an intuitive interface that is easy to implement, learn and use. A seamless integration among the accounting, inventory, and reporting applications is one of its prominent features.

GENERAL FEATURES

Web Based	More secure connection using SSL protocol
Multi-Language: Arabic, English & Others	Multi-Currency
Multi-Company & Branches	User Friendly

FIXED ASSETS SYSTEM FEATURES

Manage owned assets, keep track of depreciation's occurred on those assets and allow creating accounting entry for the depreciation lines:
